

The scatter plot displays the relationship between cluster member count (x-axis) and a metric (y-axis). The x-axis ranges from 2.5 to 12.5, and the y-axis ranges from 0 to 100. Data points are labeled with their corresponding cluster member count. A thick horizontal line is drawn at y=50. The plot shows a general trend where the metric increases with cluster member count, with some outliers.
